

67% IN CT CALL FOR GOV ROWLAND TO STEP DOWN; 55% BACK IMPEACH

* EXCLUSIVE SURVEYUSA RESEARCH RESULTS *

YOU MUST CREDIT SURVEYUSA IF YOU AIR, CITE

OR REPRINT THESE RESULTS IN WHOLE OR PART

A MAJORITY IN THE GOVERNOR'S OWN PARTY NOW SAY HE SHOULD STEP DOWN

- * TWO THIRDS OF CT'S REGISTERED VOTERS SAY GOV JOHN ROWLAND SHOULD RESIGN, ACCORDING TO THIS EXCLUSIVE WABC TV-NEWS POLL OF 500 CT VOTERS CONDUCTED 1/13 + 1/14 BY SURVEYUSA.
- * A MAJORITY SAY THAT IF THE GOVERNOR DOES NOT RESIGN, LAWMAKERS SHOULD TAKE STEPS TO REMOVE HIM FROM OFFICE BY IMPEACHMENT.
- * 55% OF THOSE IN ROWLAND'S OWN REPUBLICAN PARTY NOW SAY HE SHOULD STEP DOWN, COMPARED TO 78% OF DEMOCRATS AND 66% OF INDEPENDENTS. IF ROWLAND DOES NOT RESIGN, 41% OF REPUBLICANS FAVOR IMPEACHMENT, COMPARED TO 67% OF DEMOCRATS AND 55% OF INDEPENDENTS.
- * MOST CT VOTERS HAVE NO IMPRESSION OF LT GOV JODI RELL, WHO WOULD REPLACE ROWLAND.

The following is a material part of this report and should be included when data is referenced:

How this poll was conducted: This SurveyUSA poll was conducted by telephone in the voice of a professional announcer. All respondents heard the questions asked identically. Page 1 of this report contains: the geography that was surveyed; the dates interviews were conducted; the news organization that paid for the research; and the name of the random sample provider. The universe of respondents and the margin of error are stated on Page 2 of this report, and if restated on one or more subsequent pages, it is because the universe and margin of error changed for those subsequent questions. Where necessary, responses were weighted according to age, gender, ethnic origin, geographical area and number of adults and number of voice telephone lines in the household, so that the sample would reflect the actual demographic proportions in the population, using most recent U.S. Census estimates. In theory, with the stated sample size, one can say with 95% certainty that the results would not vary by more than the stated margin of error, in one direction or the other, had the entire universe of respondents been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than theoretical calculations of sampling error. These include refusals to be interviewed, question wording and question order, weighting by demographic control data and the manner in which respondents are filtered (such as, determining who is a likely voter). It is difficult to quantify the errors that may result from these factors. Fieldwork for this survey was done by SurveyUSA of Verona, NJ. These statements conform to the principles of disclosure of the National Council on Public Polls.
