Clinton Halves Trump Lead in Kansas; GOP Incumbent Moran Positioned for Easy Re-Election to US Senate:

In the Red State of Kansas, which Republican Mitt Romney carried by 22 points in 2012, Republican Donald Trump leads Democrat Hillary Clinton by 5 points, 44% to 39%, in an election today, 08/08/16, three months to Election Day, according to this latest KSN News poll conducted by SurveyUSA. Libertarian Gary Johnson gets 8% today, with twice as much support from Republican voters as Democrats; 9% of Kansas' most likely voters are today undecided.

Trump holds just 74% of the Republican base. Clinton holds 87% of the Democratic base. Among strong Republicans, Clinton gets 4% of the vote. Among strong Democrats, Trump gets zero percent of the vote. Among very conservative voters, Clinton siphons 11% of the vote. Among very liberal voters, Trump siphons 2% of the vote.

Just 39% of Trump supporters are voting "for" Trump. 60% of Trump supporters are voting "against" Clinton. In contrast, 66% of Clinton supporters are voting "for" Clinton. 31% of Clinton supporters are voting "against" Trump. 50% of Trump supporters say they vote for Trump "enthusiastically," compared to 63% of Clinton voters who vote for her "enthusiastically." 46% of Trump supporters vote for Trump "with reservations," compared to 35% who vote for Clinton "with reservations." Of those voting for the Libertarian Johnson, 35% are voting "for Johnson," another 35% are voting "against Trump."

Voters focused on the economy split, 42% for the businessman Trump, 41% for the politician Clinton. Voters focused on terrorism back Trump 2:1. Voters focused on education back Clinton 5:1. Voters focused on immigration back Trump by nearly 3:1. Trump leads among evangelicals by 33 points. Trump leads in military households by 24 points. Trump leads by 3:2 among the least educated voters and by 5:3 among the least affluent voters. Clinton leads by 10 points among the most affluent Kansans. Trump leads in Greater Wichita and Greater Topeka. Clinton leads in Greater Kansas City KS.

Trump leads by 14 points among men. Clinton leads by 4 points among women. An 18-point Gender Gap. The Gender Gap is not larger because, in a rural state such as Kansas, Trump carries rural women by 7 points. Trump carries suburban men by 12 points. Clinton carries suburban women by 6 points. Clinton carries independent women by 20 points. Trump carries independent men by 9 points.

Compared to a SurveyUSA poll released 4 weeks ago, immediately before both the Republican National Convention and the Democratic National Convention, Trump had led by 11 points in Kansas, now 5. Moran had led Wiesner by 19 points (in a hypothetical head-to-head conducted before the Kansas primary). Today, with Wiesner the confirmed Democratic nominee, Moran leads by 20 points. Then, 39% of Kansas voters had an extremely unfavorable opinion of Trump. Today, 41% have an extremely unfavorable opinion of Trump. Then, 50% had an extremely unfavorable opinion of Clinton. Today, 44% have an extremely unfavorable opinion of Clinton. Then, Moran had a Plus 19 Net Favorability Rating. Now, Moran has a Plus 25 Net Favorability Rating. Then, Republican Governor Sam Brownback had a Minus 50 Net Favorability Rating. Today, Brownback has a Minus 36 Net Favorability Rating. Then, US Senator Pat Roberts had a Minus 8 Net Favorability Rating. Today, Roberts has a Minus 2 Net Favorability Rating. Every Republican tested in Kansas has improved in the past 4 weeks except Trump. President Barack Obama was at Minus 5 four weeks ago. Today, Obama is at Minus 7.

About / Filtering / Context: SurveyUSA interviewed 800 state of Kansas adults 08/03/16 through 08/07/16. Of the adults, 673 were registered to vote in the state of Kansas. Of the registered voters, SurveyUSA determined that 566 were likely to vote in the 11/08/16 Presidential election and 541 were likely to vote in the contest for U.S. Senator. Of the registered voters, 4% tell SurveyUSA that they always vote in Presidential elections but will not vote in this year's Presidential election, because they do not like any of the candidates. 5% tell SurveyUSA that they almost never vote in Presidential elections, but in 2016 they will go out of their way to vote because they are particularly drawn to one of the candidates. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (60% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (aka: the cell-phone respondents, 40% of likely voters) were shown a questionnaire on their smartphone, tablet or other electronic device. Kansas has 6 electoral votes. In 2012, Republican Mitt Romney carried Kansas by 22 points. In 2008, Republican John McCain carried Kansas by 15 points. In 2004, Republican George W. Bush carried Kansas by 25 points. In 2000, Bush carried Kansas by 21 points.

---

1 Kansas will elect a President on Tuesday, November 8. Please listen to these 5 statements and tell me which ONE statement best describes you:
One: I always vote in Presidential elections, and will definitely vote in this year's presidential election.
Two: I always vote in Presidential elections, but this year, I do not like the candidates, so I will not vote in the presidential election this year.
Three: I'm not sure yet whether I will or will not vote this year.
Four: I rarely vote in Presidential elections, but this year I will go out of my way to vote.
Five: I don't vote in Presidential elections, and I won't vote this year.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
