Percentages

1 Week Till Votes are Counted, Trump on Auto-Pilot in Reliably Red Kansas; GOP Moran Coasts to US Senate Finish Line:

In 3 SurveyUSA tracking polls conducted for KSN-TV in Wichita, Republican Donald Trump led by 12 points on 09/12/16, led by 11 points on 10/17/16, and leads by 11 points today, 10/31/16. 30% of the interviews for this survey were completed before the FBI threw the election into chaos 10/28/16. 70% of the interviews for this survey were completed after the FBI announcement. The pendulum may swing yet further before votes are counted, but in this freeze-frame of research results: Trump led by 9 points before the FBI announcement. Trump led by 12 points after the FBI announcement.

Clinton resentment has increased. The percentage of Trump supporters who are voting "against Clinton" has gone from 38% on 09/12/16 to 47% on 10/17/16 to 50% today. At the same time, it is important to note that among voters who have already returned a ballot, in Kansas as elsewhere, Clinton is outperforming Trump. Specifically, Clinton leads Trump 50% to 42% among early voters. This may be a reflection of Clinton's more sophisticated get-out-the-vote operation, or it could be evidence that Trump voters are fast to talk-the-talk but not so fast to walk-the-walk. Trump leads Clinton by 15 points among voters who have not yet filled out a ballot but who promise to do so before polls close.

In the contest for United States Senator from Kansas, incumbent Republican Jerry Moran is well positioned at this hour for a second full term, 24 points ahead of Democratic challenger Patrick Wiesner. 2 weeks ago, Moran led Wiesner 56% to 31%, today, 55% to 31%. Libertarian Robert Garrard is at 6% today, up 1 point from 2 weeks ago. In rural Kansas, Moran leads by 43 points. Among seniors, Moran leads by 36 points. Among evangelical voters, Moran leads by 59 points.

When voters turn their attention to the Kansas state legislature, 38% say it would be best if Kansas elected more conservatives, 34% say it would be best if Kansas elected more moderates, 17% say it would be best if Kansas elected more liberals.

When voters are asked whether they will vote to retain the 5 state Supreme Court justices who are on the November ballot, 20% say they will vote to retain none of the justices; 26% say they will vote to retain all of the justices; 15% say they will vote to retain one justice; the rest of voters will pick and choose.

Statewide Favorability Ratings :

- * Democratic President Barack Obama is viewed extremely favorably by 19% of KS voters, extremely unfavorably by 41%.
- * Trump is viewed extremely favorably by 13% of KS voters, extremely unfavorably by 39%.
- * Clinton is viewed extremely favorably by 10% of KS voters, extremely unfavorably by 53%.
- * Republican Governor Sam Brownback is viewed extremely favorably by 5% of KS voters, extremely unfavorably by 52% .
- * Republican Senator Pat Roberts is viewed extremely favorably by 9% of KS voters, extremely unfavorably by 17%.
- * Moran is viewed extremely favorably by 15% of KS voters, extremely unfavorably by 9%.

Context and Methodology :

SurveyUSA interviewed 800 state of Kansas adults 10/26/16 through 10/30/16. 30% of the interviews for this survey were completed prior to the FBI announcement 10/28/16 that additional Clinton-related emails of possible consequence had been identified on a device not previously known to the FBI. Of the adults, 693 were registered to vote. Of the registered, 624 were determined by SurveyUSA to have already returned a ballot or to be likely to do so before polls close on 11/08/16. 2% of voters interviewed for this survey said they almost always vote in Presidential elections, but would not vote in 2016 because they did not like any of the candidates on the ballot. An offsetting 4% of voters said they almost never vote in Presidential elections but would vote in 2016 because they were drawn to one of this year's candidates. This research was conducted using blended sample, mixed mode. Respondents reachable on their home telephones (60% of likely voters) were interviewed on their home telephones in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (40% of likely voters) were shown a questionnaire on the display of their smartphone, tablet or other electronic device. Kansas has 6 electoral votes in 2016. In 2012, Mitt Romney carried the state by 22 points as Obama won a 2nd term. In 2008, John McCain carried the state by 15 points as Obama won his 1st term. In 2004, George W Bush carried KS by 25 points over John Kerry on Bush's way to a 2nd term. In 2000, Bush carried KS by 21 points. Early voting began 10/19/16.

Kansas will elect a President on Tuesday, November 8. Please listen to these 6 statements and tell me which ONE statement best describes you:

One: I have already voted.

Two: I always vote in Presidential elections, and will definitely vote in this year's presidential election.

Three: I always vote in Presidential elections, but this year, I do not like the candidates, so I will not vote in the presidential election this year.

Four: I'm not sure yet whether I will or will not vote this year.

Five: I rarely vote in Presidential elections, but this year I will go out of my way to vote.

Six: I don't vote in Presidential elections, and I won't vote this year.

** Too few respondents of this type were interviewed for this data to be meaningful.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
