What are White, Middle-Class Primary Voters Trying to Say?

Neither Burisma Nor Bloopers Nor Unexpected Grand-Baby Can Take Bloom off Biden Rose for Democrats Desperate to Defeat Donald Trump; While Warren & Sanders Do-Si-Do for 2nd Place Nationally, Buttigieg Leaps into 4th, Doubling His Support In a Month; Then Came Bloomberg ...

10 weeks to the Iowa Caucuses, likely Democratic primary voters nationwide can't quit Joe Biden, according to SurveyUSA's newest tracking poll, conducted immediately after the 11/20/19 Democratic Candidate Debate in Atlanta. Though Biden's children and now suddenly a grandchild are in the news for all the wrong reasons, though Biden continues to demonstrate to all who pay attention that he struggles to express himself, though he inadvertently steps on the toes of his core constituents, and though Republicans see him as a punching bag, Biden's poll numbers are inert.

In 4 consecutive SurveyUSA tracking polls, Biden has never polled higher than 33%, never polled lower than 32%. Though some see the former Vice President's pants on fire, likely Democratic Primary voters stick with the devil they know. Biden has led in every SurveyUSA nationwide poll, never by less than 10 points, today by 15 points.

Given the chance to choose any of the Democrats still in the race, but before Michael Bloomberg is added to the mix, likely primary voters today appear to have second thoughts about Elizabeth Warren, who drops 6 points from October to November and now polls at 16%, one statistically-insignificant point behind Bernie Sanders, who today, for the 3rd consecutive month, polls at 17%.

Pete Buttigieg had been at 5% in both September and October, but today, as Americans set their Thanksgiving tables, Buttigieg leaps to 12% nationwide, materially ahead of the rest of the pack, 4 points behind Warren and 7 points ahead of Kamala Harris who, despite a strong performance in Atlanta, today finishes 5th.

Combined, Harris and Cory Booker, the other black Democrat on the debate stage, have the support of 12% of African American Democratic primary voters. By contrast, Biden is today backed by 53% of African American Democratic primary voters. Biden was backed by 35% of black Democrats in August, 42% of black Democrats in September, and now 53% of black Democrats in November. 1% of black voters back Buttigieg.

Among white middle-class Democrats, Buttigieg's support doubles month-on month, vaulting Mayor Pete past Warren and past Sanders and landing in Biden's rear-view mirror.

Among the oldest Democratic voters, age 65+, Biden is comparatively steady with 43%, but Buttigieg has now leapfrogged Warren into 2nd place. From October to November, Warren's support among seniors was halved, from 26% to 12%. Between September and November, Buttigieg among seniors went from 5% to 10% to today 16%.

Among Democrats who tell SurveyUSA they are "just getting by," Biden is down 4, Warren is down 5, and Buttigieg is up 9, from 3% in October to 12% today. Among Democrats who say they are prospering, Warren lost 11 points month-on-month, Buttigieg gained 14 points, from 4% in October to 18% today, effectively even with Sanders, who at 20% runs 2nd to Biden at 33%.

Among suburban men, Buttigieg leapfrogs Warren and is effectively even with Sanders for 2nd place, behind Biden. Among suburban women, Buttigieg catches Sanders for 3rd place, behind Warren and Biden.

81% of likely Democratic primary voters say they are happy with the choices they have for President. Of those who are unhappy, the 2 names that are volunteered most often are Hillary Clinton and Michelle Obama.

When SurveyUSA re-asks primary voters who they prefer with Michael Bloomberg and Deval Patrick added to the existing list, Bloomberg finishes 7th at 3%, nominally behind Andrew Yang (4%) and nominally ahead of Booker (2%). Bloomberg siphons approximately 1 of every 20 Warren voters and 1 of every 20 Buttigieg voters. Patrick finishes last, nominally behind Amy Klobuchar (2%), Tom Steyer (2%), Tulsi Gabbard (1%), and Julian Castro (1%).

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
