In KS, Pat Roberts' Primary Lead Erodes, and Roberts' November Prospects Are Complicated by Independent Orman;

For Governor, Democratic Davis-Docking Ticket, Newly Backed by High Profile KS Republicans, Remains in Driver's Seat; Kansas Incumbent Republican Pat Roberts, hoping to sail to re-election to his fourth term in the US Senate, finds himself no longer able to take for granted the 08/05/14 Republican Primary, and, should he survive the primary, no longer able to guarantee a win in the November general election, according to SurveyUSA research conducted for KSN-TV in Wichita. Roberts hodds pleads conservative primary challenger Milton Wolf by 20 points. That's substantial, but down from the 33-point lead that Roberts had 1 month ago, when SurveyUSA last polled this contest. There is little movement among conservative voters, where you might expect to find it. There is movement among moderates, where Wolf has halved Roberts lead poll-on-poll. There is a laso movement among conservative voters age 50 to 64, where Roberts had led by 31 points, now 8. Assuming Roberts dispatches Wolf in the primary, Roberts' life is then complicated by Independent Greg Orman, who today takes 14% of the vote in a hypothetical general election match-up. 3 months till early voting in the 11/04/14 election begins, it's Roberts 38%, Democrat Chad Taylor 33%, Orman at 14%, and Libertarian Randall Batson at 4%. Roberts holds just 59% of the Republican base. Orman gets 30% of the vote among Independents. Orman takes twice as many Republican votes (13%) as he takes Democratic votes (6%). Roberts is above 50% only in rural Western KS. He is at 43% in greater Wichita, 36% in greater Wichita, 36% in greater Wichita, 36% in greater Kansas City, and 33% in Eastern KS. For Governor, Sam Brownback's Kansas Experiment is slowly coming into the national spotlight. Today, in a hypothetical head-to-head, the incumbent Republican the Publican Libertarian take to the same promoters and promoters age 50 to 64. Only among voters under age 50 to 64

If the Republican Primary for Kansas Governor were today, which Republican ticket would you vote for? (tickets rotated) Sam Brownback and Jeff Colyer? Or Jennifer Winn and Robin Lais?

^{**} Too few respondents of this type were interviewed for this data to be meaningful.

Statement of Methodology: About the Poll: This poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. The pollster's report includes the geography that was surveyed; the date(s) interviews were conducted, the number of respondents who answered each question and the theoretical margin of sampling error for each question. Where necessary, respondents were weighted using the most recent US Census estimates for age, gender, ethnic origin and region, to align the sample to the population. In theory, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents with home telephones been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than sampling error. These include: the difficulty of interviewing respondents who do not have a home telephone; the refusal by some with home telephones to be interviewed; the order in which questions are asked; the wording of questions; the way and extent to which data are weighted; and the manner in which specialized populations, such as likely voters, are determined. It is difficult to quantify the errors that may result from these and other factors. Research methodology, questionnaire design and fieldwork for this survey were completed by SurveyUSA of Clifton, NJ. This statement conforms to the principles of disclosure of the National Council on Public Polls.
