On Eve of Final Presidential Debate, Trump in California Risks Getting Smaller Percentage of Popular Vote Than Any Republican Candidate in the Past 100 Years; Recreational Marijuana Prop 64 Still Leads Ever-So-Slightly; Harris Safe:

Both Donald Trump and Hillary Clinton have lost support in the past 17 days, as Republicans beat up on Clinton and Democrats beat up on Trump, according to a SurveyUSA pre-election tracking poll conducted for KABC-TV in Los Angeles, KPIX-TV San Francisco, KGTV-TV San Diego, and KFSN-TV Fresno.

Compared to an identical poll conducted before the 1st Presidential debate, Clinton is down 3 points, Trump is down 3 points, and undecided voters have doubled. Today, as then, Clinton's lead is 26 percentage points.

With Trump's support down to 30% at this hour, he falls below the Plimsoll line, and risks receiving a smaller percentage of the popular vote than any Republican candidate in the past 100 years. The low-water mark is currently held by George Herbert Walker Bush, who got 33% of the popular vote in California in a 3-way contest in 1992.

Trump's support has steadily eroded among the youngest voters, down from 29% in mid-September to 25% in late-September to 20% today. Among independents, Trump has dropped from 28% in mid-September to 22% in late-September to 17% today. Among high-school educated voters, Trump has fallen from 48% to 28%. Among gun owners, Trump has fallen from 47% to 37%. Among affluent voters, Trump has fallen from 38% to 31%.

Counter-intuitively, given the cloud that Trump now campaigns under, his support among Evangelicals has increased, from 46% to 49% to now 53%. Clinton among Evangelicals has fallen from 46% to 36%. Among strong Republicans, Trump is up from 80% to 89%. Clinton is down from 19% to 6%. Among very conservative voters, Clinton is down from 29% to 19%. Among very liberal voters, Trump is down from 6% to 2%, Clinton is up from 84% to 92%. The number of Trump supporters who say they are not voting "for Trump," but rather "against Clinton," has increased from 36% to 43% to now 46%. At the same time, the number of Trump voters who acknowledge having reservations about Trump has not budged: 33% then, 33% now.

In an election today for United States Senator from CA, to replace retiring Democrat Barbara Boxer, Democrat Kamala Harris leads Democrat Loretta Sanchez, 45% to 24%. The 21-point Harris advantage is up materially poll-on-poll; it is her largest lead to date. The number of Latinos voting for Harris has dropped from 39% to 35% to now 30%. The number of independents voting for Harris has increased from 27% to 33% to now 35%.

### Ballot Measures:

- \* Prop 56, which would increase the tax on cigarettes to \$2 per pack, is favored to pass 57% to 35%. Support has eroded.
- \* Proposition 62, which would end the death penalty in CA and replace it with life in prison, trails by 18 points today and is headed for defeat.
- \* Proposition 63, which outlaws large-capacity magazines and requires background checks on ammo purchases, leads by more than 2:1 and will pass.
- \* Proposition 64, which would legalize, regulate and tax recreational marijuana, is backed 51% to 40%. Unchanged from mid-and late-September.

### Statewide Favorability Ratings:

- \* President Barack Obama is viewed extremely favorably by 39% of CA voters, extremely unfavorably by 24%.
- \* Trump is viewed extremely favorably by 12% of CA voters, extremely unfavorably by 56%. Worse than before.
- \* Clinton is viewed extremely favorably by 20% of CA voters, extremely unfavorably by 33%. Worse than before.
- \* Governor Jerry Brown is viewed extremely favorably by 15% of CA voters, extremely unfavorably by 17%. Unchanged.
- \* Dianne Feinstein is viewed extremely favorably by 17% of CA voters, extremely unfavorably by 18%.
- \* Boxer is viewed extremely favorably by 17% of CA voters, extremely unfavorably by 21%. Better than before.

### Context and Methodology:

SurveyUSA interviewed 900 state of California adults 10/13/16 through 10/15/16. All interviews were conducted after the 2nd Presidential debate on 10/09/16, and during a time of unflattering revelations about both Trump and Clinton. Of the adults, 820 were registered to vote. Of the registered, 725 were judged by SurveyUSA to have already voted in the Presidential election or as certain to do so before polls close on 11/08/16. Of registered voters, 3% tell SurveyUSA they almost always vote in a Presidential election but will not vote in 2016 because they do not like any of the candidates. 6% of voters tell SurveyUSA they almost never vote in Presidential elections but will vote in 2016 because they are particularly drawn to one of the candidates. The survey was conducted using blended sample, mixed mode. Respondents reachable on their home telephones (58% of likely voters) were interviewed on their home telephones in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (42% of likely voters) were shown a questionnaire on the screen of their smartphone, tablet or other electronic device. Polling ballot measures and citizen initiatives is an inexact science. In general, having nothing to do with California specifically and having nothing to do with 2016 uniquely, opposition to a ballot measure increases as Election Day approaches. Rarely does support for a ballot measure increase over time. As a result, the outcome of Prop 64 cannot be assured at this hour.

13 Proposition 63 is known as the Firearms and Ammunition Sales Initiative. A YES vote would require persons who want to buy ammunition to pass a background check with the California Department of Justice. And Proposition 63 would make it against the law to possess large-capacity ammunition containers, known as magazines. Will you vote YES on 63, to require background checks on ammo purchases and to make large-capacity magazines illegal? Or will you vote NO on 63, which would leave the existing system in place?

Currently, medical marijuana is legal in California, but recreational marijuana is not. Proposition 64 would legalize and tax the recreational use of marijuana. Will you vote YES on Proposition 64, which would legalize the recreational use of marijuana by adults age 21 and older, and which would license, regulate and tax the marijuana industry? Or, will you vote NO on 64, which would keep state laws as they now are?

# Results of SurveyUSA Election Poll #23233

Geography: California  
Data Collected: 10/13/2016 - 10/15/2016  
Release Date: 10/17/2016  
Counts (Frequencies)

: KABC-TV Los Angeles, KFSN-TV Fresno, KGTV-TV San Diego, KPIX-TV San Francisco

**Statement of Methodology:** SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to [editor@surveyusa.com](mailto:editor@surveyusa.com).
