

Results of SurveyUSA Election Poll #14476

Geography: New Mexico  
Data Collected: 09/29/2008 - 09/30/2008  
Release Date: 10/01/2008  
Percentaaes

**New Mexico Looks Less-and-Less Like a Toss-Up, 5 Weeks Till Votes are Counted:** In an election for President of the United States in New Mexico today, 10/01/08, Democrat Barack Obama defeats Republican John McCain 52% to 44%, according to this latest SurveyUSA poll conducted exclusively for KOB-TV in Albuquerque. Compared to an identical poll released two weeks ago, both candidates' numbers are unchanged. While overall numbers remain steady, there is some offsetting movement along gender lines:Among men, Obama had led by 10, now leads by 2. Among women, Obama had led by 6, now leads by 14 -- an 8-point swing toward McCain among men and a reciprocal 8-point swing in Obama's favor among women. Obama cannot win the state without the support of Hispanic Americans and Native Americans. McCain leads by 9 points among New Mexico whites; Obama leads by 37 points among Hispanics and by 33 points among Natives. If Hispanic turnout is overstated in this model, so is Obama's lead. If Hispanic turnout is understated in this model, so is Obama's lead. 13% of Republicans cross over to vote for Obama; 17% of Democrats cross over to vote for McCain; independents favor Obama by 16 points. Among voters who are younger than Barack Obama, Obama leads by 12 points. Among voters older than John McCain, McCain leads by 11. Among those who are in-between the two candidates' ages, Obama leads by 10.

**Filtering:** SurveyUSA interviewed 900 New Mexico adults 09/29/08 and 09/30/08. Of them, 795 were registered to vote. Of the registered voters, 698 were determined by SurveyUSA to be likely voters in the 11/04/08 general election. New Mexico has 5 Electoral College votes. George W. Bush carried New Mexico by 5,988 votes in 2004; Al Gore carried New Mexico by 366 votes in 2000.

1 If the election for President were today, would you vote for ... (choices rotated) Republican John McCain? Or, Democrat Barack Obama?

\*\* Too few respondents of this type were interviewed for this data to be meaningful.

**Statement of Methodology:** About the Poll: This poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. The pollster's report includes the geography that was surveyed; the date(s) interviews were conducted, the number of respondents who answered each question and the theoretical margin of sampling error for each question. Where necessary, respondents were weighted using the most recent US Census estimates for age, gender, ethnic origin and region, to align the sample to the population. In theory, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents with home telephones been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than sampling error. These include: the difficulty of interviewing respondents who do not have a home telephone; the refusal by some with home telephones to be interviewed; the order in which questions are asked; the wording of questions; the way and extent to which data are weighted; and the manner in which specialized populations, such as likely voters, are determined. It is difficult to quantify the errors that may result from these and other factors. Research methodology, questionnaire design and fieldwork for this survey were completed by SurveyUSA of Clifton, NJ. This statement conforms to the principles of disclosure of the National Council on Public Polls.
