In Georgia, Clinton Unable to Seal the Deal, Trails Trump by 7 With 11 Days to Go:

Democrats have high hopes for Georgia's 16 electoral votes, but Hillary Clinton falls short in an election today, 10/28/16, according to SurveyUSA polling for WXIA-TV, the Tegna station in Atlanta.

Republican Donald Trump is at 49%, Clinton at 42%, and Libertarian Gary Johnson at 3% at this hour. Among voters who have already returned a ballot, Trump leads by 6. Among voters who have not yet returned a ballot but who promise to vote before polls close on 11/08/16, Trump leads Clinton by 8. When the 2 groups are combined, Trump leads by 7, up from a 4-point Trump lead when SurveyUSA last polled Georgia for WXIA in August.

Trump leads by 58 points among rural men, by 56 points among voters focused on immigration, by 46 points among evangelical voters, by 44 points among whites, by 37 points among rural women, by 28 points among seniors, by 26 points in Northwest GA (which includes Dalton, Rome and 53 counties to the North and West of Greater Atlanta), by 26 points among college-educated whites, by 22 points among middle-income voters and by 18 points among high-school educated men.

Clinton holds 93% of the Democratic base and leads among moderates by 17 points. Although she does have a 21-point edge among just suburban women, when all women statewide are compiled, Clinton leads by just 4 points, not enough to overcome Trump's 21-point advantage among men statewide.

- * 52% of Trump backers are voting "for Trump," 46% are voting "against Clinton," a [material change](#) from August.
 - * 63% of Clinton backers are voting "for Clinton," 33% are voting "against Trump," a [slight change](#) from August.
 - * 58% of Trump backers are enthusiastic about their candidates, compared to 67% of Clinton backers.
 - * 40% of Trump backers have reservations about their candidate, compared to 30% of Clinton backers.
-
- * 62% of voters (87% of Republicans, 28% of Democrats) say Clinton's leaked emails are important in 2016.
 - * 47% of voters (14% of Republicans, 88% of Democrats) say Trump's income taxes are important in 2016.
 - * 46% of voters (15% of Republican, 85% of Democrats) say Trump's history with women is important in 2016.
 - * 43% of voters (22% of Republicans, 73% of Democrats) say Trump talk about not accepting an election outcome is important.
 - * 27% of voters (42% of Republicans, 12% of Democrats) say Bill Clinton's history with women is important in 2016.

Favorability Ratings:

- * President Barack Obama is viewed extremely favorably by 27% of GA voters, extremely unfavorably by 36%.
- * Trump is viewed extremely favorably by 17% of GA voters, extremely unfavorably by 38%.
- * Clinton is viewed extremely favorably by 14% of GA voters, extremely unfavorably by 47%.

Respondent Filtering / Historical Context:

SurveyUSA interviewed 800 state of GA adults 10/25/16 through 10/27/16. Of the adults interviewed, 683 were registered to vote in Georgia. Of the registered voters, 5% say they "almost always" vote in Presidential elections but will not vote in 2016 because they do not like any of the candidates on the ballot. An offsetting 5% say they "almost never" vote in Presidential elections but will vote in 2016 because they are uniquely drawn to one of the candidates. These so-called "new" voters split; they do not disproportionately favor Trump. Of the registered voters, 593 were determined by SurveyUSA to have already returned a ballot or to be likely to do so before polls close on 11/08/16. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (64% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (36% of likely voters) were shown a questionnaire on the display of their smartphone, tablet or other electronic device. Georgia last voted for a Democrat for President in 1992, when Bill Clinton captured the state's then 13 electoral votes by 1 percentage point over George H. W. Bush. In 2012, Mitt Romney carried Georgia by 8 points. In 2008, John McCain carried Georgia by 7 points. George W. Bush carried Georgia by 17 points in 2004 and by 12 points in 2000.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
