Results of SurveyUSA Election Poll #23031

As Republicans Gather in Cleveland for RNC Convention, Majority in Kansas Say Delegates Should Be Bound To Candidate Who Won Primary;
Trump Leads Clinton by 11 Points, Though Most of His Backers Have Reservations; GOP's Moran Well Positioned For Re-Election to U.S. Senate:

As Speaker of the U.S. House of Representatives Paul Ryan prepares to gavel the 2016 Republican National Convention to order, Republican Donald Trump leads Democrat Hillary Clinton 47% to 36% in the red state of Kansas, with Libertarian Gary Johnson siphoning votes from Trump, according to a SurveyUSA poll conducted for KSN News in Wichita.

But will Trump be the Republican nominee? Yes, if Kansas voters have a say: 52% say delegates to the convention should be bound to the candidate their state obligates them to support, compared to 39% who say delegates should be free to vote their conscience. Within 7 days, Kansans will learn whether an attempt to deny Trump the nomination and replace him with an as yet unnamed alternative will succeed.

There is good reason for concern. Of those Kansans who vote for Trump in an election "today," a majority, 54%, do so with reservations. 42% say they support Trump enthusiastically. Worse, 55% of Trump voters say they are not voting "for" Trump, but rather are voting "against" Clinton.

The news is not as bad for Clinton: 55% of those who vote for Clinton in an election "today" do so enthusiastically, compared to 41% who vote for Clinton with reservations. 60% of Clinton voters say they are voting "for" Clinton, compared to 39% who say they are voting "against" Trump.

The polarization of the Kansas electorate is striking:

* 77% of Democrats have an "extremely unfavorable" view of Trump.
* 77% of Republicans have an "extremely unfavorable" view of Clinton.

Trump leads narrowly among Kansas unaffiliated voters; Clinton leads materially among self-identified moderates. Libertarian Johnson, polling at 8%, has 3 times as much Republican support as Democratic support.

* Trump wins evangelical voters by 37 points.
* Trump wins military households by 29 points.
* Trump wins rural voters by 22 points.
* Trump wins suburban voters by 8 points.
* Clinton wins urban voters by 7 points.
* Greater Wichita, which includes Sedgwick and 64 surrounding counties, backs Trump by 14 points.
* Greater Topeka, which includes Shawnee and 30 surrounding counties, backs Trump by 28 points.
* Greater Kansas City KS backs Clinton by 5 points.

* Trump leads by 40 points among those with a high-school education.
* Trump leads by 8 points among Kansans earning less than $40,000 a year.
* Trump leads by 21 points among Kansans earning $40,000 to $80,000 a year.
* The wealthiest and most educated Kansans split.

* Voters who say the economy is the most important issue facing the country narrowly back Clinton.
* Voters who say terrorism is the most important issue overwhelmingly back Trump.
* Voters who say national security is the most important issue split.

In the contest for United States Senator from Kansas, incumbent Republican Jerry Moran is well positioned at this hour to defeat either of the 2 Democratic challengers he may face in November. Moran leads Patrick Wiesner today 52% to 33%. Moran leads Monique Singh today 54% to 30%. 51% of Kansas voters have a favorable view of Moran, 32% have an unfavorable view.

By contrast:

40% have a favorable view of U.S. Senator Pat Roberts, 49% have an unfavorable view.
22% have a favorable view of Governor Sam Brownback, **72%** have an unfavorable view (including 50% with an "extremely unfavorable" view).
47% have a favorable view of President Barack Obama, 52% have an unfavorable view.
41% (among all voters) have a favorable view of Donald Trump, 55% have an unfavorable view.
32% (among all voters) have a favorable view of Hillary Clinton, 66% have an unfavorable view (including 50% with an "extremely unfavorable" view).

About / Filtering / Context: SurveyUSA interviewed 800 state of Kansas adults 07/08/16 through 07/11/16. Of the adults, 675 were registered to vote. Of the registered voters, SurveyUSA determined that 559 were likely to vote in the 11/08/16 Presidential election and 537 were likely to vote in the contest for U.S. Senator. Of the registered voters, 4% tell SurveyUSA that they always vote in Presidential elections, but in 2016 they will go out of their way to vote in Presidential elections, but will not vote in this year's Presidential election, because they do not like any of the candidates. Another 4% tell SurveyUSA that they almost never vote in Presidential elections, but in 2016 they will go out of their way to vote because they are particularly drawn to one of the candidates. Although there are just a handful of these "new" voters, and caution should be used when extrapolating, new voters back Trump 4:1. "Protest" voters --- those who say they will not vote for any Presidential candidate --- offset; there are

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
