SURVEYUSA KSTP-TV (Minneapolis)

In Minnesota, Clinton 7 Atop Trump on Eve Of 1st Presidential Debate:

Minnesota's 10 Electoral Votes at this hour appear likely to remain blue, according to a SurveyUSA poll conducted for KSTP-TV in the Twin Cities.

When likely voters are presented with 4 candidates for President, including Libertarian Gary Johnson and Green Party candidate Jill Stein, both of whom are on the ballot in 2016, Democrat Hillary Clinton tops Republican Donald Trump, 46% to 39%, with Johnson at 6% and Stein at 2%. When the same likely voters are asked how they would vote if the only choice were between Clinton and Trump, Clinton's margin shrinks ever-so-slightly from 7 points to 6 points, 49% to 43%.

Trump leads 11:1 among Strong Republicans, but Clinton leads 24:1 among Strong Democrats. That difference, on the extreme ends of the political spectrum, lays the groundwork for Clinton to carry the state. Among very conservative voters, 15% defect to Clinton, triple the number of very liberal voters who defect to Trump. Trump leads among evangelicals 2:1, leads among rural men by 2:1, leads among rural men by 2:1, leads among those with a 4-year college degree, leads in Western MN by 3:2 and leads in Northeastern MN 5:4. Clinton leads by 18 points among those with a 4-year college degree, leads by 16 points among seniors, leads by 15 points among women, leads by 15 points among women, leads by 15 points among the least affluent voters and by 9 points among the most affluent works, but Clinton leads by 12 points among the least affluent voters and by 9 points among the most affluent voters.

Trump leads among voters focused on immigration, terrorism and national security. Clinton leads among voters focused on the economy, the environment and education. Trump leads by 20 points among independent men. Clinton leads by 10 points among independent women. In rural Minnesota, Trump leads 2:1 among men, runs even with Clinton among women. In suburban Minnesota, Trump leads by 4 among men, Clinton leads by 13 among women.

52% of those voting for Clinton say they cast their ballot enthusiastically, compared with 54% of Trump voters. 45% of Clinton voters say they cast their vote "with reservations," compared to 44% of Trump voters are voting "for" Clinton, compared to 39% who are voting "against Trump." 52% of Trump voters are voting "for Trump," compared to 46% who are voting "against Clinton." Filtering and Context:

SurveyUSA interviewed 800 state of Minnesota adults 09/16/16 through 09/20/16. Of the adults, 743 were registered to vote. Of the registered voters, 625 were determined by SurveyUSA to return a ballot on or before the 11/08/16 deadline. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (65% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (35% of likely voters) were shown a questionnaire on the display of their smartphone, tablet or other electronic device. 6% of registered voters tell SurveyUSA that they almost always vote in a Presidential election but will not this year, because they do not like the candidates on the ballot. 2% of registered voters tell SurveyUSA they almost never vote in a Presidential election but will this year because they are particularly drawn to one of the candidates. Minnesota last voted for a Republican for President in 1972, when Richard Nixon carried 49 states. In 2012, Obama defeated John McCain by 10 points. In 2004, Democrat John Kerry defeated George W. Bush by 3 points in Bush's attempt for a 2nd term. In 2000, Democrat Al Gore defeated Bush by 2 points in Bush's bid for a 1st term.

If the election for President of the United States were today, and you were filling out your ballot right now, who would you vote for? (names rotated) Republican Donald Trump? Democrat Hillary Clinton? Libertarian Gary Johnson? Green Party candidate Jill Stein? Or some other candidate?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone. and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
