Percentages

26 Yrs After Entering the U.S. Senate, Democrat Feinstein Cannot Get Above 40% Today, 3 Wks Till Votes Are Counted;
Two-Thirds of Republican Voters Cannot Decide Whether Feinstein or Fellow Democrat de Leon Is Lesser of Two Evils:

Newsom Comfortably Atop Cox in Governor's Race; Props 1, 6, 7, 11 Favored To Pass; Prop 8 Dicey; Prop 10 Likely to Fail:

Dianne Feinstein, who seeks her 5th full term in the United States Senate, may win, but she's yet to seal the deal, according to SurveyUSA polling conducted for KABC-TV in Los Angeles, KPIX-TV in San Francisco, and KGTV-TV and the Union-Tribune in San Diego. Feinstein is at 40% today, with early voting well underway. She is a known quantity to every voter in the state, and yet she leads her (fellow) Democratic opponent Kevin de Leon by just 14 percentage points, 40% to 26%, with an astonishing 35% of likely voters undecided, 3 weeks till votes are counted.

Feinstein has majority support only among Democrats (where she is backed by 61% of likely voters), among those who voted for Hillary Clinton in 2016 (where she is backed by 62% of likely voters), among liberals (where she is backed by 53% of likely voters), among those who disapprove of the job Donald Trump is doing as President (where she is backed by 54% of likely voters), and among Bay Area residents (where Feinstein was Mayor of San Francisco 1970s and 1980s and where she today is backed by 51% of likely voters).

Feinstein fails to get to 50% support among men, women, voters of all ages, white, minorities, the less educated, the more educated, the less affluent, the more affluent, union households, non-union households, and in urban, suburban, and rural portions of the state.

De Leon's coalition by contrast is noted neither for its breadth nor depth, and it would be an extraordinary upset for him to oust the Senate's oldest member and longest-serving female member. Though Feinstein's victory is far from certain, she has this going for her: Of those voting for Feinstein, 60% do so enthusiastically, compared to just 42% who vote for de Leon enthusiastically. 36% of Feinstein voters say they vote for her with reservations, compared to 51% of de Leon's supporters who have reservations about him.

In the contest to replace the Governor's seat vacated by retiring two-term Governor Jerry Brown, Democrat Gavin Newsom leads Republican John Cox 52% to 35%. Of those voting for Cox, 65% say they do so enthusiastically, compared to just 57% of those who are voting for Newsom. Of those voting for Cox, just 26% say they have reservations, compared to 30% who say they have reservations about Newsom. 40% of likely voters have a favorable opinion of Newsom, compared to 34% who have a favorable opinion of Cox.

Newsom leads by 11 points among whites, by 25 points among Latinos and by 16 points among Asians. Newsom leads Cox by 31 points among suburban women, but trails Cox by 4 points among suburban men. Cox narrowly leads in the Central Valley and Inland Empire, but Newsom leads by 18 points in greater Los Angeles and by 47 points in the Bay Area.

- * Proposition 1 leads 3:1 at this hour. A "yes" vote would allow CA to borrow money for veterans.
- * Proposition 6 leads by 2:1 at this hour. A "yes" vote repeals fuel-tax increases that went into law in 2017.
- * Proposition 7 leads by nearly 3:1 at this hour. A "yes" vote paves the way for CA to do away with Daylight Savings Time.

* Proposition 8, on kidney dialysis, could go either way. Prop 8 leads 47% to 34% at this hour, but that is close enough for SurveyUSA to observe that opposition to ballot measures, having nothing uniquely to do with California or with 2018, typically increases as election day approaches. Though the odds are in favor of Prop 8 at this moment, history suggests that a far closer outcome is possible. A "yes" vote on 8 limits how much profit a dialysis clinic may make and requires dialysis clinics to return excess profits to patients or to the insurance companies that paid for the dialysis.

* Proposition 10 trails 46% to 35% today. A "yes" vote on 10 would allow local governments to put in place whatever forms of local rent control they desire. A "no" vote would allow rent-control to be administered at the state level.

* Proposition 11 leads by nearly 2:1 at this hour. A "yes" vote requires paramedics to remain on call during their breaks, eliminates company liability for past violations of employee break laws, and requires employers to provide additional training and mental health services for paramedics.

About : SurveyUSA interviewed 1,200 state of CA adults 10/12/18 through 10/14/18. Of the adults, 964 are registered to vote. Of the registered voters, SurveyUSA determined that 762 had either already returned a ballot or were likely to do so before the 11/06/18 deadline. This research was conducted online.

11 Also on the ballot this year are a number of constitutional amendments and citizens' initiatives. We're going to ask you about 6 of them.
<p>
First, Proposition 1, which is the Veterans and Affordable Housing Act of 2018. A YES vote on Prop 1 would allow the state to borrow \$4 billion to spend on low-cost housing and low-cost loans for veterans. A NO vote on Prop 1 would prevent the state from borrowing the money to spend on housing and loans for veterans. On Proposition 1, how do you vote? ?

Next, Proposition 6, a constitutional amendment which would repeal gasoline and diesel taxes, and vehicle fees, that were enacted in 2017 and would require any future fuel taxes be approved by voters. A YES vote on Prop 6 would repeal fuel tax increases that were enacted in 2017, including the Road Repaid and Accountability Act of 2017. A NO vote on Prop 6 would keep the fuel taxes imposed in 2017 by the California legislature in place, and would allow the legislature to impose whatever fees and taxes it approved in the future, provided 2/3 of the CA House and 2/3 of the CA Senate approved. On Proposition 6, how do you vote?

14Next, Proposition 8, which would place limits on how much profit a Kidney Dialysis Clinic is allowed to keep in California. A YES vote on Prop 8 means that a kidney dialysis clinic that has revenues that are 15% greater than its costs, must refund the excess profit to the patients, or to the insurance companies who paid for the dialysis. A NO vote on Prop 8 would keep the current system, which means that dialysis clinics may make as much profit as they wish. On Proposition 8, how do you vote?

Last, Proposition 11, which has to do with ambulance employees and paramedics. A YES vote on Prop 11 does 4 things: It requires that paramedics remain on call during their breaks, while being paid at their regular rate; it eliminates ambulance company liability for past violations of the employee break law; it requires employers to provide additional training for paramedics, and it requires employers to provide paramedics with paid mental health service. A NO vote on Prop 11 would require paramedics not be on call during their breaks, would have no impact on liability for past violations of the law, and would not require the companies to provide additional training or mental health services. On Proposition 11, how do you vote?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPPI). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
