Out of Time, Trump Fails to Make Inroads in Minnesota Against Clinton, Who Now Leads By 10 With 12 Days Left:

Democrat Hillary Clinton, who led Republican Donald Trump by 7 points in Minnesota a month ago, today leads Trump by 10 points, with the finish line in sight, according to SurveyUSA polling for KSTP-TV in in the Twin Cities.

At this hour, it's Clinton 49%, Trump 39%, Libertarian Gary Johnson 5%, and Green Party candidate Jill Stein 2%. 11% of likely voters tell SurveyUSA they have already returned a ballot, and among those "early" voters, Clinton leads by 48 points, 71% to 23%. Sometimes early voters are a measure of enthusiasm for a candidate and other times early voters are a indicator of one campaign's better-organized get-out-the-vote effort --- the so-called "ground game." Among voters who have not returned a ballot but who promise to do so before polls close 11/08/16, Trump trails by 5 points, 46% to 41%. To overcome Clinton's stockpiled advantage and capture The Land of 10,000 Lakes' 10 electoral votes, Trump would need to win "late" voters by 8 points.

If Johnson, Stein and all other minor-party candidates are scraped off the ballot and only Trump and Clinton remain, Clinton defeats Trump by 11 points in a head-to-head slugfest today, 53% to 42%.

Enthusiasm for both Trump and Clinton remains tepid: just 49% of Trump voters are voting "for Trump," 48% are voting "against Clinton." 58% of Clinton backers are "for Clinton," 40% are "against Trump." These numbers are largely unchanged month-on-month. 50% of Trump voters are enthusiastic, 47% have reservations. 54% of Clinton voters are enthusiastic, 45% have reservations.

* One month ago, Trump led among independent men by 20 points, now that group is tied.
* One month ago, Trump led among all independents by 6, now trails by 5.
* One month ago, Clinton led among women by 15 points, now by 20.
* One month ago, Trump led among voters with a high-school education by 6 points, now by 1.
* One month ago, Trump led among Generation X by 8, now trails by 13. X marks the spot .

* 85% of Republicans but just 24% of Democrats say leaked emails from the Clinton campaign are important to this year's election.
* 94% of Democrats but just 16% of Republicans say Trump's history with women is important to this year's Presidential election.
* 48% of Republicans but just 5% of Democrats say Bill Clinton's history with women is important to this year's Presidential election.

Approval Ratings :

* President Barack Obama has a Plus 6 Net Job Approval Rating in MN: 50% of voters approve of the job Obama is doing; 44% disapprove.
* Governor Mark Dayton has a Plus 8 Net Job Approval Rating in MN: 49% of voters approve of the job Dayton is doing; 41% disapprove.
* U.S. Senator Al Franken has a Plus 21 Net Job Approval Rating in MN: 54% of voters approve of the job Franken is doing; 33% disapprove.
* U.S. Senator Amy Klobuchar has a striking Plus 33 Net Job Approval Rating: 59% of voters approve of the job Klobuchar is doing; 26% disapprove.
* 24% statewide approve of the job the Minnesota legislature is doing, 56% disapprove.

Filtering and Context:

SurveyUSA interviewed 800 state of Minnesota adults 10/22/16 through 10/26/16. Of the adults, 733 were registered to vote. Of the registered voters, 656 had either already returned a ballot or were judged by SurveyUSA to be likely to do so before polls close on 11/08/16. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (67% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (33% of likely voters) were shown a questionnaire on the display of their smartphone, tablet or other electronic device. 3% of registered voters today tell SurveyUSA that they almost always vote in a Presidential election but will not this year, because they do not like the candidates on the ballot, down from 6% a month ago. 2% of registered voters tell SurveyUSA they almost never vote in a Presidential election but will this year because they are particularly drawn to one of the candidates. Minnesota last voted for a Republican for President in 1972, when Richard Nixon carried 49 states. In 2012, Obama defeated Mitt Romney in Minnesota by 8 points. In 2008, Obama defeated John McCain in Minnesota by 10 points. In 2004, Democrat John Kerry defeated George W. Bush by 3 points in Bush's attempt for a 2nd term. In 2000, Democrat Al Gore defeated Bush by 2 points in Bush's bid for a 1st term.

20 The state legislature did not provide $140 million in new financing for the Southwest Light Rail project, so the Met Council and two other agencies had to raise the money themselves. Was the state legislature right? Or wrong? To not provide the new financing for the project?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP).
