500 adults from the entire state of Kansas were interviewed by SurveyUSA 01/24/13 through 01/27/13, exclusively for the Kansas Policy Institute. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (67% of adults) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (33% of adults) were shown a questionnaire on their smartphone, tablet, or other electronic device.

1 Some local governments in Kansas are meeting with local chambers of commerce, representatives of the Environmental Protection Agency, or EPA, and other groups to work together to plan how local communities should develop... sometimes called "sustainable communities." How do you respond to this statement: Local governments should work with the EPA and other local groups to plan my community as a "sustainable community." Do you ... strongly agree? Somewhat agree? Somewhat disagree? Or strongly disagree?

3 A state court has effectively ordered legislators to increase school funding by \$443 million, which would also automatically increase local property taxes by another \$154 million. Regardless of whether you believe schools are adequately funded, how would you respond to this statement: It is appropriate for the courts to have final say on decisions of how much taxpayer money is spent on education.

7 The Kansas Department of Education says total taxpayer support of public education this year will be \$12,738 per-pupil, a new record. Based on that, how would you respond to this statement: Kansas public schools are unfunded and should be given more money by raising taxes or reducing funding for other state services.

7 The Kansas Department of Education says total taxpayer support of public education this year will be \$12,738 per-pupil, a new record. Based on that, how would you respond to this statement: Kansas public schools are unfunded and should be given more money by raising taxes or reducing funding for other state services.

9 In 2009, the Legislature passed a law that requires utility companies to purchase electricity generated by wind and other renewable sources. This action will cause electricity rates to increase because renewable energy is more expensive. How would you respond to this statement: Legislators should promote the use of renewable energy, even if doing so causes electricity rates to increase.

State and local governments withhold voluntary union dues from employees who join government unions, a portion of which is used by unions for political purposes. Which of these best describes what you think governments should do: Withhold the union dues, including the portion that is used for political purposes? Withhold regular membership dues only, so that employees wishing to contribute to money for political purposes would write their own personal checks? Or withhold no union dues, regardless of how the money is used?

3 A state court has effectively ordered legislators to increase school funding by \$443 million, which would also automatically increase local property taxes by another \$154 million. Regardless of whether you believe schools are adequately funded, how would you respond to this statement: It is appropriate for the courts to have final say on decisions of how much taxpayer money is spent on education.

9 In 2009, the Legislature passed a law that requires utility companies to purchase electricity generated by wind and other renewable sources. This action will cause electricity rates to increase because renewable energy is more expensive. How would you respond to this statement: Legislators should promote the use of renewable energy, even if doing so causes electricity rates to increase.

10 State and local governments withhold voluntary union dues from employees who join government unions, a portion of which is used by unions for political purposes. Which of these best describes what you think governments should do: Withhold the union dues, including the portion that is used for political purposes? Withhold regular membership dues only, so that employees wishing to contribute to money for political purposes would write their own personal checks? Or withhold no union dues, regardless of how the money is used?

10 State and local governments withhold voluntary union dues from employees who join government unions, a portion of which is used by unions for political purposes. Which of these best describes what you think governments should do: Withhold the union dues, including the portion that is used for political purposes? Withhold regular membership dues only, so that employees wishing to contribute to money for political purposes would write their own personal checks? Or withhold no union dues, regardless of how the money is used?

Statement of Methodology: About the Poll: This poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. The pollster's report includes the geography that was surveyed; the date(s) interviews were conducted, the number of respondents who answered each question and the theoretical margin of sampling error for each question. Where necessary, respondents were weighted using the most recent US Census estimates for age, gender, ethnic origin and region, to align the sample to the population. In theory, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents with home telephones been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than sampling error. These include: the difficulty of interviewing respondents who do not have a home telephone; the refusal by some with home telephones to be interviewed; the order in which questions are asked; the wording of questions; the way and extent to which data are weighted; and the manner in which specialized populations, such as likely voters, are determined. It is difficult to quantify the errors that may result from these and other factors. Research methodology, questionnaire design and fieldwork for this survey were completed by SurveyUSA of Clifton, NJ. This statement conforms to the principles of disclosure of the National Council on Public Polls.
