In California, Immediately Prior to Pneumonia Reveal, Clinton Far Ahead of Trump; Harris Atop Sanchez in Fight for Boxer's Open Senate Seat;
Death Penalty Likely to Survive, But Ballot Measures on Recreational Marijuana, Background Checks & New Cigarette Tax Ahead At This Hour:

8 weeks till votes are counted in California, in interviews conducted in the days immediately prior to Hillary Clinton's collapse on 09/11/16 in New York City, Clinton is in front of Donald Trump by margins comparable to Barack Obama's defeat of Mitt Romney and John McCain, according to a SurveyUSA pre-election tracking poll conducted for KABC-TV Los Angeles, KPIX-TV San Francisco, KGTV-TV San Diego, and KFSN-TV Fresno.

Clinton leads Trump by 25 points in California today, 57% to 32%, with Libertarian Gary Johnson at 3% and Green Party candidate Jill Stein at 1%. These numbers are likely to change, of course, after news of Clinton's illness is digested by voters. Obama carried California by 23 points in 2012 and by 24 points in 2008. Clinton today leads by 30 points among all women, leads by 28 points among suburban moms, and leads by 52 points among single moms. She leads by 18 points among white voters, by 24 points among Asian American voters, by 31 points among Latino voters, and by 58 points among African American voters.

Clinton leads by 38 points among 1st-generation Californians (those whose parents were born in another country). She leads by 30 points among 2nd-generation Californians (those with 1 or more grandparents born in another land). Clinton holds 90% of the Democratic base, compared to 80% of Republican who stand with Trump. Independents break for Clinton by 17 points. Moderates break for Clinton by 39 points.

Trump leads Clinton by 4 points among gun owners. Trump closes to within 17 points of Clinton among voters who grew up in a household where one parent hit the other. Clinton leads by 28 points among voters who did not witness domestic violence between their parents growing up. Trump runs 12 points stronger among motorcycle owners than he does among voters who do not ride a bike. Clinton leads by 52 points among vegetarians. The candidates run even in the Inland Empire, but Clinton leads by more than 2:1 in Greater Los Angeles and by more than 3:1 in the Bay Area. Catholics are ever-so-slightly more likely to back Clinton than Trump. Union households vote the same as non-union households. Trump ties Clinton in evangelical homes; Clinton leads by 38 points in non-evangelical homes.

In the election for United States Senator from CA, to replace retiring Democrat Barbara Boxer, Democrat Kamala Harris leads Democrat Loretta Sanchez, 44% to 27%, but, 4 weeks till early voting begins, almost a third of likely voters remain undecided in the contest. Harris leads overwhelmingly among Asian Americans and African Americans, and leads comfortably among whites. Latinos split. Sanchez narrowly leads among voters who have lived in California less than 10 years. Harris leads among those who have lived in California 10+ years. Harris leads among men and women, rich and poor, educated and uneducated. Harris leads in urban areas, suburban areas and rural areas and in all 4 named regions of the state. Those who voted for Boxer in 2010 back Harris in 2016 by 40 points. Those who voted for Carly Fiorina in 2010 narrowly favor Sanchez in 2016.

Ballot Measures:

* Proposition 56, which would increase the tax on cigarettes to $2 per pack, is favored to pass by nearly 2:1.
* Proposition 62, which would end the death penalty in CA and replace it with life in prison, trails by 16 points today and is headed for defeat.
* Proposition 63, which outlaws large-capacity magazines and requires background checks before ammo can be purchased, leads by more than 2:1.
* Proposition 64, which would legalize, regulate and tax recreational marijuana, is supported 52% to 40%. Caution advised.

Statewide Favorability Ratings:

* President Obama is viewed extremely favorably by 36% of CA voters, extremely unfavorably by 24%.
* Trump is viewed extremely favorably by 13% of CA voters, extremely unfavorably by **52%** .
* Clinton is viewed extremely favorably by 19% of CA voters, extremely unfavorably by 31%.
* Governor Jerry Brown is viewed extremely favorably by 15% of CA voters, extremely unfavorably by 18%.
* Dianne Feinstein is viewed extremely favorably by 14% of CA voters, extremely unfavorably by 17%.
* Boxer is viewed extremely favorably by 14% of CA voters, extremely unfavorably by 22%.

Context and Methodology:

SurveyUSA interviewed 900 state of California adults 09/08/16 through 09/11/16. Of the adults, 782 were registered to vote. Of the registered, 678 were determined by SurveyUSA to be likely to vote in the 11/08/16 general election. Of registered voters, 4% tell SurveyUSA they almost always vote in a Presidential election but will not vote in 2016 because they do not like any of the candidates. An offsetting 6% of voters tell SurveyUSA they almost never vote in Presidential elections but will vote in 2016 because they are particularly drawn to one of the candidates. 87% of the interviews for this survey were completed before Clinton buckled at Ground Zero the morning of 09/11/16 and before doctors offered pneumonia as an explanation. The survey was conducted using blended sample, mixed mode. Respondents reachable on their home telephones (53% of likely voters) were interviewed on their home telephones in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (47% of likely voters) were shown a questionnaire on the screen of their smartphone, tablet or other electronic device. Polling ballot measures and citizen initiatives is an inexact science. In general, having nothing to do with California specifically and having nothing to do with 2016 uniquely, opposition to a ballot measure increases as Election Day approaches. Rarely does support for a ballot measure increase over time. It is likely that opposition to Propositions 56, 62, 63 and 64 will increase once early voting begins in one month, on 10/10/16. This may alter the calculus on recreational marijuana Proposition 64, which today has the most fragile advantage of those measures tested.

13 Proposition 63 is known as the Firearms and Ammunition Sales Initiative. A YES vote would require persons who want to buy ammunition to pass a background check with the California Department of Justice. And Proposition 63 would make it against the law to possess large-capacity ammunition containers, known as magazines. Will you vote YES on 63, to require background checks on ammo purchases and to make large-capacity magazines illegal? Or will you vote NO on 63, which would leave the existing system in place?

13 Proposition 63 is known as the Firearms and Ammunition Sales Initiative. A YES vote would require persons who want to buy ammunition to pass a background check with the California Department of Justice. And Proposition 63 would make it against the law to possess large-capacity ammunition containers, known as magazines. Will you vote YES on 63, to require background checks on ammo purchases and to make large-capacity magazines illegal? Or will you vote NO on 63, which would leave the existing system in place?

14 Currently, medical marijuana is legal in California, but recreational marijuana is not. Proposition 64 would legalize and tax the recreational use of marijuana. Will you vote YES on Proposition 64, which would legalize the recreational use of marijuana by adults age 21 and older, and which would license, regulate and tax the marijuana industry? Or, will you vote NO on 64, which would keep state laws as they now are?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
