In Washington State, Early 'Banked' Votes Are Salvation for Democrats Clinton, Inslee and Murray; Late Red Tide May Turn Evergreen And Other Blue States Purplish When Votes Are Counted; Carbon Tax Likely To Be Defeated;

Intentionally or otherwise, FBI Director James Comey has turned the 11/08/16 general election upside down, triggering a red riptide that may extend beyond the top of the ticket, according to SurveyUSA research conducted in Washington State for KING-TV in Seattle.

Pollsters, like candidates, are in uncharted waters during these final 5 days of the 2016 campaign. That caveat acknowledged, here is SurveyUSA's best take on the numbers we have gathered:

Democrat Hillary Clinton is way ahead among Washington state voters who have already returned a ballot, but the contest is effectively even among likely voters who have not yet voted. When the 2 groups are combined, it's Clinton 50%, Trump 38%, minor party candidates 9%.

Incumbent Democratic Governor Jay Inslee is way ahead among Washington state voters who have already returned a ballot, but Republican Bill Bryant leads among likely voters who have not yet voted. When the 2 groups are combined, it's Inslee 50%, Bryant 43%.

Incumbent Democratic Senator Patty Murray is way ahead among Washington State voters who have already returned a ballot, but Republican Chris Vance draws even with Murray among likely voters who have not yet voted. When the 2 groups are combined, it's Murray 53%, Vance 41%.

Here are 3 different ways to interpret the discrepancy between early and late voters across all of the top-of-ticket contests:

- 1** : Republicans in 2016 are all talk, no walk. They won't show up on Election Day. Democrats cruise to victory in Washington State and elsewhere.
- 2** : The air went out of the Democrats' balloon with Comey's 10/28/16 announcement; the wind is now at the Republicans' back. All bets are off.
- 3** : Clinton's "ground game" has her just where she is supposed to be; the Comey announcement is a non-story.

Next Tuesday, we'll know which of these hypotheses is correct.

Clinton leads by 31 points among the youngest voters but by just 5 among seniors. The younger the electorate, the better Clinton will do. Trump leads by 24 points in Eastern WA. Clinton leads 2:1 in metropolitan Seattle. Trump holds 85% of the Republican base. Clinton holds 94% of the Democratic base. Independents split. Moderate break for Clinton 5:3. Clinton leads by 12 points among the most affluent voters and by 22 points among the most educated voters. She leads by 22 points in urban Washington and by 19 points in suburban Washington. Trump leads by 10 points in rural Washington. Clinton leads by 29 points among single voters; married voters split. Clinton leads by 27 points among voters who have lived in Washington State less than 20 years. Clinton leads by just 7 points among those who have lived in Washington more than 20 years.

Among voters who say honesty is the most important quality in a Presidential candidate, Trump leads Clinton by more than 2:1. Among voters who say integrity is the most important quality, Clinton leads Trump by 18 points. Among voters who say the economy is the most important issue in the choice of a President, Clinton leads Trump by 15 points. Among voters who say the Supreme Court is the most important issue, Trump leads Clinton by 20 points. Of Clinton backers, 64% are voting "for Clinton," 35% are voting "against Trump." Of Trump backers, 59% are voting "for Trump," 38% are voting "against Clinton."

Inslee leads by 23 points in metropolitan Seattle, edges Bryant in Western WA, but trails Bryant by more than 2:1 in Eastern WA. Inslee leads by 11 among women, and more specifically leads by 15 points among suburban women. Bryant leads by 14 points among rural men, but trails by 14 points among urban men and by 4 points among suburban men. Inslee leads by 21 points among the youngest voters, but trails Bryant by 3 points among seniors. Of Trump supporters, 92% vote for Bryant. Of Clinton supporters, 88% vote for Inslee, 9% defect to Bryant.

Of voters who say the economy is the most important issue in the contest for Governor, Inslee edges Bryant 49% to 44%. Of voters who say education is most important in the Governor's race, Inslee leads by 52 points. Of voters who say taxes are most important, Bryant leads by 60 points.

Murray is positioned for reelection to her 5th term in the United States Senate, with a 33-point lead among urban women and a 23-point lead among suburban women. Vance leads by 10 points in military households and leads by 28 points in Eastern WA. Of those voting for the Republican Bryant for Governor, 84% vote for the Republican Vance for Senator, 13% cross-over for Murray. Of those who vote for the Democrat Inslee for Governor, 92% stay with the Democrat Murray for Senator.

In the election for State Superintendent of Public Instruction, a large number of undecided voters make the outcome uncertain. Among voters with a preference, Chris Reykdal edges Erin Jones 32% to 28%, but 41% of likely voters are not sure how they will vote for Superintendent. Among voters who say they have already returned a ballot, Reykdal and Jones are tied, 35% each. Too-close-to-call.

Initiative 1433 , which would raise the minimum wage, leads 56% to 38% at this hour, with overwhelming support among early voters, tepid support among those who have not yet returned a ballot. 1433 leads by 35 points among high-school educated voters and by 35 points among lower-income voters. The measure is almost certain to pass.

Initiative 732 , which would impose a carbon emission tax on the sale or use of certain fossil fuels, trails badly at this hour and is likely to be defeated. Republicans oppose 732 by nearly 6:1, conservatives oppose 732 by 7:1. Democrats favor 732 but only by 5:4.

Favorability Ratings:

- * 32% of voters have an extremely favorable opinion of President Barack Obama, 31% have an extremely unfavorable opinion.
- * 14% of voters have an extremely favorable opinion of Clinton, 41% have an extremely unfavorable opinion.
- * 12% of voters have an extremely favorable opinion of Trump, 51% have an extremely unfavorable opinion.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
