**Fight to the Finish in Los Angeles Mayor Election: Garcetti and Greuel Now Tied, 11 Days Till Votes are Counted:** 46% Garcetti, 46% Greuel, SurveyUSA finds in its latest KABC-TV pre-election tracking poll on the race for Mayor of Los Angeles. The sea-saw contest had Garcetti leading by 9 points 1 month ago, and Greuel leading by 3 points 2 weeks ago. But today, 05/10/13, the candidates are exactly even, with 8% of likely voters still undecided. Greuel and Garcetti are within 2 points of each other in every age group. Men tip slightly to Garcetti. Women tip slightly to Greuel. Whites and Latinos slightly favor Garcetti. African Americans by 2:1, and Asian Americans ever-so-slightly, favor Greuel. Garcetti leads among Republicans. Greuel leads among Democrats and Independents. Wealthier and well-educated voters favor Garcetti. Less affluent and less educated voters favor Greuel. In the contest for City Attorney, incumbent Carmen Trutanich appears to have made inroads against challenger Mike Feuer. Feuer had led by 18 points in March, then led by 12, then led by 10, and today leads by just 6 points. Trutanich is making up ground among conservatives and among younger voters. In the contest for City Controller, Dennis Zine maintains a 12-point lead over Ron Galperin. There has been little movement in the contest compared to an identical SurveyUSA poll 2 weeks ago. On the 3 ballot questions about medical marijuana: \* Proposition D leads by nearly 2:1, largely unchanged from 2 weeks ago.

- \* Ordinance E trails by 13 points, identical to 2 weeks ago.
- \* Measure F leads by 34 points, largely unchanged from 2 weeks ago.

**Cell-phone and home-phone respondents included in this research.** SurveyUSA interviewed 1,000 city of Los Angeles adults 05/05/13 through 05/08/13. Of the adults, 839 were registered to vote. Of the registered, 556 were identified by SurveyUSA as likely to vote in the 05/21/13 primary. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (82% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (18% of likely voters) were shown a questionnaire on their smartphone, tablet or other electronic device.

**1** If the election for Los Angeles Mayor were today, who would you vote for? Eric Garcetti? Or Wendy Greuel?

**Statement of Methodology:** About the Poll: This poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. The pollster's report includes the geography that was surveyed; the date(s) interviews were conducted, the number of respondents who answered each question and the theoretical margin of sampling error for each question. Where necessary, respondents were weighted using the most recent US Census estimates for age, gender, ethnic origin and region, to align the sample to the population. In theory, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents with home telephones been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than sampling error. These include: the difficulty of interviewing respondents who do not have a home telephone; the refusal by some with home telephones to be interviewed; the order in which questions are asked; the wording of questions; the way and extent to which data are weighted; and the manner in which specialized populations, such as likely voters, are determined. It is difficult to quantify the errors that may result from these and other factors. Research methodology, questionnaire design and fieldwork for this survey were completed by SurveyUSA of Clifton, NJ. This statement conforms to the principles of disclosure of the National Council on Public Polls.
