500 adults from the entire state of Kansas were interviewed by SurveyUSA 12/18/13 and 12/19/13, exclusively for the Kansas Policy Institute. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (67% of adults) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (33% of adults) were shown a questionnaire on their smartphone, tablet, or other electronic device.

1 A state court has effectively ordered legislators to increase school funding by \$443 million, which would also automatically increase local property taxes by another \$154 million. Regardless of whether you believe schools are adequately funded, how would you respond to this statement: It is appropriate for the courts to have final say on decisions of how much taxpayer money is spent on education.

If the Kansas Supreme Court orders an increase in taxpayer funding to public schools, what would you most want to see the legislature do in response? Increase your property taxes? Increase your sales taxes? Increase your income tax? Reallocate spending from other parts of government to get more money into classrooms? Try to find more efficient ways to spend the money already allocated to schools? Or something else?

All Questions Crosstabbed By All Questions

1 A state court has effectively ordered legislators to increase school funding by \$443 million, which would also automatically increase local property taxes by another \$154 million. Regardless of whether you believe schools are adequately funded, how would you respond to this statement: It is appropriate for the courts to have final say on decisions of how much taxpayer money is spent on education.

3 If the Kansas Supreme Court orders an increase in taxpayer funding to public schools, what would you most want to see the legislature do in response? Increase your property taxes? Increase your sales taxes? Increase your income tax? Reallocate spending from other parts of government to get more money into classrooms? Try to find more efficient ways to spend the money already allocated to schools? Or something else?

12 A school voucher system allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools. If this policy were adopted, tax dollars currently allocated to a school district would be allocated to parents in the form of a "school voucher" to pay partial or full tuition for their child's school.

Statement of Methodology: About the Poll: This poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. The pollster's report includes the geography that was surveyed; the date(s) interviews were conducted, the number of respondents who answered each question and the theoretical margin of sampling error for each question. Where necessary, respondents were weighted using the most recent US Census estimates for age, gender, ethnic origin and region, to align the sample to the population. In theory, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents with home telephones been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than sampling error. These include: the difficulty of interviewing respondents who do not have a home telephone; the refusal by some with home telephones to be interviewed; the order in which questions are asked; the wording of questions; the way and extent to which data are weighted; and the manner in which specialized populations, such as likely voters, are determined. It is difficult to quantify the errors that may result from these and other factors. Research methodology, questionnaire design and fieldwork for this survey were completed by SurveyUSA of Clifton, NJ. This statement conforms to the principles of disclosure of the National Council on Public Polls.
