Statement from SurveyUSA

A free press is essential to the functioning of a free society.

Labeling the work of journalists as “fake news” is dangerous.

To then go beyond that, and label the work of research scientists as “fake polls” calls all of Democracy into question. It silences the very individuals who elected you, takes power away from “We, The People,” and attempts to consolidate that power in an omnipotent being.

For 27 years, SurveyUSA® has been Proud to be America’s Pollster®.

We will continue to give voice to every American, regardless of their leaning.

We encourage everyone to participate in opinion surveys when you are invited to do so.

Speak freely.

Each of your voices is vital to the functioning of this Republic.
