Movement to Democrats in California Governor and US Senate Contests: Democrat Jerry Brown, running for Governor, and Democrat Barbara Boxer, seeking reelection as a U.S. Senator, today 09/22/10 finish ahead of their Republican opponents for the first time in 2 months of SurveyUSA tracking, according to new polling commissioned by KABC-TV Los Angeles, KPIX-TV San Francisco, KGET-TV San Diego, and KFSN-TV Fresno. In the race for the open Governor’s seat, Brown today edges Republican Meg Whitman 46% to 43%, a result within the survey’s theoretical margin of sampling error, but a result that reflects a 10 point swing to the Democrat over the past 3 weeks. Brown has gained strength and Whitman has lost strength among young and old, men and women, and in all regions of the state. A similar swing and similar movement in the US Senate race benefits incumbent Democrat Barbara Boxer, who today edges Republican Carly Fiorina 49% to 43%, Boxer’s first lead in 2 months of SurveyUSA polling and an 8 point swing to the Democrat over the past 3 weeks. Boxer, like Brown, has gained as Fiorina has fallen among both men and women, young and old, and throughout the state. By contrast, two other statewide contests in California polled at the same time show little or no movement, suggesting that the changes in the governor and US Senate contest are real rather than the result of random sample variation. For Lieutenant Governor, Democrat Gavin Newsom today is nominally atop incumbent Republican Abel Maldonado, 44% to 41%. Compared to 3 weeks ago, Newsom is flat; Maldonado is up a nominal 2 points. In 6 weeks of SurveyUSA polling, Newsom has never polled below 43% or above 44%; Maldonado has never polled below 39% or above 42%. Support for Proposition 19, which would legalize marijuana and allow for its regulation and taxation, also remains essentially unchanged over the past 3 weeks. Today, 47% vote “Yes” on 19, 42% vote “No.” Opposition to 19 is above 50% among conservatives, Republicans, tea party supporters, pro-life voters, and the oldest voters. Support is above 50% among men, younger voters, liberals, Democrats, pro-choice voters, higher-income voters, and in the Bay Area.

SurveyUSA interviewed 1,000 California adults 09/19/10 through 09/21/10. If the election for California Governor were today, who would you vote for? Republican Meg Whitman? Democrat Jerry Brown? Or another candidate?

### Candidate names rotated

**California Governor:**
- **Republican Meg Whitman:** 43% of voters support Whitman.
- **Democratic Jerry Brown:** 46% of voters support Brown.

3 [Candidate names rotated] br-California will also elect a Lieutenant Governor. If the election for Lieutenant Governor were today, who would you vote for? Republican Abel Maldonado? Democrat Gavin Newsom? Or another candidate?

California voters may also vote on several propositions. On Proposition 19, which would change California law to legalize marijuana and allow it to be regulated and taxed, are you ... Certain to vote yes?

Or not certain? (Not Certain voters were asked: At this hour, on Proposition 19, do you ... lean toward yes? lean toward no, or do you not lean?)

KABC-TV Los Angeles, KFSN-TV Fresno, KGTV-TV San Diego, KPIX-TV San Francisco

Statement of Methodology: About the Poll: This poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the question and the theoretical margin of sampling error for each question. Where necessary, respondents were weighted using the most recent US Census estimates for age, gender, ethnic origin and region, to align the sample to the population. In theory, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents with home telephones been interviewed with complete accuracy. There are other sources of error in all surveys that may be more serious than sampling error. These include: the difficulty of interviewing respondents who do not have a home telephone; the refusal by some with home telephones to be interviewed; and the refusal by some with home telephones to be interviewed in the way and extent to which data are weighted; and the manner in which specialized populations, such as likely voters, are determined. It is difficult to quantify the errors that may result from these and other factors. Research methodology, questionnaire design and fieldwork for this survey were completed by SurveyUSA of Clifton, NJ. This statement conforms to the principles of disclosure of the National Council on Public Polls.
