## 48 Hours Till Early Voting Begins in Kansas, No Evident Erosion in Trump Support; Republican Moran Safe:

5 weeks ago, riding high nationally, Donald Trump led Hillary Clinton by 12 points in the reliably red state of Kansas. Today, riding low, Trump leads Clinton by 11 points, effectively unchanged, as Sunflower State voters continue to see the Republican as the better choice for President, according to SurveyUSA polling conducted exclusively for KSN-TV in Wichita.

Trump is at 47%, Clinton is at 36%, Libertarian Gary Johnson is at 7% and Green Party candidate Jill Stein is at 2% today, 48 hours until early voting in Kansas begins. Any misgivings about Trump that voters have are expressed this way: 5 weeks ago, 57% of Trump voters said they were voting "for Trump," compared to 38% who said they were voting "against Clinton." Today, 51% are voting "for Trump," a decline of 6 percentage points; 47% say they are voting "against Clinton," an increase of 9 percentage points. The opposite is true of Clinton: 5 weeks ago, 55% of Clinton supporters said they were voting "for Clinton," compared to 43% who were voting "against Trump." Today, 64% of Clinton backers are voting "for Clinton," an increase of 9 percentage points; 34% are voting "against Trump," a decrease of 8 percentage points. 41% of Trump supporters today have reservations about Trump. 44% of Clinton supporters today have reservations about Clinton.

Kansas voters say the economy is the most important issue in 2016. Of voters focused on the economy, Trump leads Clinton by 15 points. Among voters who say terrorism is the most important issue, Trump leads Clinton by 25 points. Among voters who say immigration is the most important issue, Trump leads Clinton by 67 points.

Though Clinton performs better among women than men, she still trails Trump among women in Kansas. Trump leads by 6 points among all women, which is a blend of him leading by 5 points among suburban women and leading by 23 points among rural women.

In the contest for United States Senator from Kansas, incumbent Republican Jerry Moran is well positioned at this hour for a second term, 25 points ahead of Democratic challenger Patrick Wiesner. 5 weeks ago, Moran led Wiesner 50% to 34%, today, 56% to 31%. Libertarian Robert Garrard is at 5% today. In rural Kansas, Moran leads by 43 points. Among seniors, Moran leads by 44 points. Among evangelical voters, Moran leads by 59 points.

Statewide Favorability Ratings :

- \* Democratic President Barack Obama is viewed extremely favorably by 19% of KS voters, extremely unfavorably by 42%.
- \* Republican Governor Sam Brownback is viewed extremely favorably by **5%** of KS voters, extremely unfavorably by **49%**.
- \* Republican Senator Pat Roberts is viewed extremely favorably by 9% of KS voters, extremely unfavorably by 20%.
- \* Moran is viewed extremely favorably by 11% of KS voters, extremely unfavorably by 12%.

Context and Methodology :

SurveyUSA interviewed 800 state of Kansas adults 10/11/16 through 10/15/16. Of the adults, 675 were registered to vote. Of the registered, 601 were determined by SurveyUSA to be likely to vote in the 11/08/16 election for President, 549 were determined to be likely to vote in the election for U.S. Senator. 3% of voters interviewed for this survey said they almost always vote in Presidential elections, but would not vote in 2016 because they did not like any of the candidates on the ballot. An offsetting 4% of voters said they almost never vote in Presidential elections but would vote in 2016 because they were drawn to one of this year's candidates. All of the interviews for this survey were conducted after the 2nd Presidential debate on 10/09/16, but during a week when a number of women came forward with allegation of possible sexual misconduct by Trump, and at a time when Trump, claiming to be newly "unshackled," spoke less guardedly. It is unclear whether additional credible allegations will surface against Trump, or whether the allegations made thus far will be discredited and the tone and tenor of the campaign discourse will become less rancorous. This research was conducted using blended sample, mixed mode. Respondents reachable on their home telephones (62% of likely voters) were interviewed on their home telephones in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (38% of likely voters) were shown a questionnaire on the display of their smartphone, tablet or other electronic device. Kansas has 6 electoral votes in 2016. In 2012, Mitt Romney carried the state by 22 points as Obama won a 2nd term. In 2008, John McCain carried the state by 15 points as Obama won his 1st term. In 2004, George W Bush carried KS by 25 points over John Kerry on Bush's way to a 2nd term. In 2000, Bush carried KS by 21 points. Early voting begins in 48 hours, on Wednesday 10/19/16.

**12** In 2012, the state legislature changed the law so some independent businesses, known as limited liability companies, or LLCs, pay no state tax on most, and sometimes all of their income. Should the state legislature change the law so that most LLCs do pay state taxes again? Or should the legislature leave the law as it is?

**Statement of Methodology:** SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to [editor@surveyusa.com](mailto:editor@surveyusa.com).
