2 Weeks Till Votes Are Counted in CA U.S. Senate Primary, Harris & Sanchez Still Favored to Advance to 11/08/16 General Election; Clinton Well Positioned To Defeat Sanders in Primary, But Starts 10 Points Behind Obama in General Election Fire Fight With Trump:

With early primary voting underway, Democrat Kamala Harris and Democrat Loretta Sanchez appear poised to advance to a runoff, ensuring that Barbara Boxer's U.S. Senate seat continues to be held by a Democrat no matter which of these 2 candidates prevails in the 11/08/16 general election, according to a SurveyUSA poll conducted for KABC-TV in Los Angeles, KPIX-TV in San Francisco, KGTV-TV in San Diego, and KFSN-TV in Fresno.

Today, it's Harris 31%, Sanchez 22%. The 3 Republican candidates in the primary --- Duf Sundheim at 9%, Tom Del Beccaro at 9%, and Ron Unz at 7% --- combine to receive 25% of the primary vote. Among voters who tell SurveyUSA they have already returned a ballot, Harris leads at 33%, followed by Sanchez at 21%, Sundheim at 11%, and Unz and Del Beccaro at 8%. There has been little movement in the contest since SurveyUSA began polling the contest in early April. Harris has never trailed. Sanchez has always run 2nd. The 3 Republicans have consistently split the conservative vote; no one of them has ever challenged Sanchez for 2nd.

In the Presidential primary, Hillary Clinton defeats Bernie Sanders 57% to 39%. The contest is unchanged from an identical SurveyUSA poll 3 weeks ago. Sanders continues to lead among the youngest voters. Clinton leads by 12 points among voters age 35 to 49, leads by 34 points among voters age 50 to 64, and leads by 45 points among voters age 65+. Clinton gets 57% of the primary vote in union households and gets 57% of the vote in non-union households. Clinton has majority support among every income group. Sanders leads by 2:1 among 1st-time primary voters.

- * Among all California voters, 48% have an extremely negative view of Donald Trump, 30% have an extremely negative view of Clinton, 13% have an extremely negative view of Sanders.
- * Among women, 52% have an extremely negative view of Trump, 27% have an extremely negative view of Clinton, 11% have an extremely negative view of Sanders.
- * Among strong Democrats, 44% have an extremely positive view of Clinton, 24% have an extremely positive view of Sanders, 2% have an extremely positive view of Trump
- * Among independents, 4% have an extremely positive view of Clinton, 20% have an extremely positive view of Sanders, 7% have an extremely positive view of Trump.
- * Among strong Democrats, 84% have an extremely negative opinion of Donald Trump.
- * Among independents, 41% have an extremely negative opinion of Donald Trump.
- * Among strong Republicans, 39% have an extremely positive opinion of Trump, compared to 4% who have an extremely positive opinion of Clinton and 11% who have an extremely positive opinion of Sanders.
- * Among independents, 7% have an extremely positive view of Trump, 41% have an extremely negative view of Trump.
- * Among moderates, 10% have an extremely negative view of Sanders, 23% have an extremely negative view of Clinton, 46% have an extremely negative view of Trump.

Looking ahead to the 11/08/16 general election for President, Clinton carries California today 52% to 38%, keeping the Golden State's 55 Electoral Votes pale blue. Of concern to Democrats: Clinton leads Trump today by 14 points. Barack Obama carried CA by 24 points in 2008 and by 23 points in 2012. There is a Gender Gap at this hour: Trump loses California by 3 points among men, but loses by 25 points among women. It is unclear in the 170 days that remain until the next President is chosen whether this Gender Gap will close or open wider. Of greater concern to Democrats: among those who tell SurveyUSA they are paying "a lot" of attention to the 2016 election, Clinton defeats Trump in California today by just 9 points, 50% to 41%. Trump's negatives [have remained constant](#) the past 3 times SurveyUSA has polled California; Clinton's negatives [have increased](#) during that period.

About: SurveyUSA interviewed 1,800 state of California adults 05/19/16 through 05/22/16. Of the adults, 1,598 were registered to vote in the state of California. Of the CA registered voters, 803 were determined by SurveyUSA to be likely to vote in the 06/07/16 Democratic Presidential primary, 1,416 were determined to be likely to vote in the 06/07/16 open, non-partisan U.S. Senate primary, and 1,383 were determined to be likely to vote in the 11/08/16 general election for President. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (62% of registered voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (38% of registered voters) were shown a questionnaire on their smartphone, tablet or other electronic device. California's 55 Electoral Votes are 20% of the 270 that any candidate needs to be elected to the White House. For additional California context: John Kerry defeated George W Bush by 10 points in 2004. Al Gore defeated Bush by 12 points in 2000.

1 Primary voters will be asked to vote for a candidate for United States Senator. If you were filling out your ballot in the United States Senate primary now, who would you vote for? (candidate names rotated) Republican Tom Del Beccaro? Republican Duf Sundheim? Republican Ron Unz? Democrat Kamala Harris? Democrat Loretta Sanchez? Or one of the other candidates?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
