OH Voters Are Focused on Job Creation, Opposed to Affordable Care Act, Split on Same-Sex Marriage, In Favor of Medical Marijuana: One week to the 05/06/14 Ohio Primary, Buckeye voters are focused on job creation, ahead of health care and taxes, according to a SurveyUSA poll conducted exclusively for WCMH-TV in Columbus. Job creation is especially driving the ballot-box decisions of lower-income voters, men and middle-aged voters. Healthcare is on the mind of seniors, and Republicans, though for different reasons. Taxes are motivating young voters, conservatives, and voters with children. Ohio voters oppose the Affordable Care Act, also known as Obamacare, 54% to 37%. Whites and blacks, and Democrats and Republicans, see the issue in stark contrast. Ohio voters support the medical use of marijuana, 56% to 37%, with opposition coming from seniors and conservatives. Ohio voters split on the issue of same-sex marriage. 43% support legalizing gay marriage. 49% oppose. 48% say Ohio should recognize same-sex marriages that have been performed in other states; 45% say Ohio should not recognize such marriages. Heading into the final week before the 05/06/14 Primary: * 46% approve of the job that Republican John Kasich is doing as Governor. 39% disapprove.

* 33% have a favorable opinion of Democratic candidate Ed Fitzgerald; 23% have an unfavorable opinion; significantly: 45% have no opinion of Fitzgerald.

* 46% of voters say Ohio is on the right track; 43% say Ohio is on the wrong track.

In a hypothetical election today for Governor of Ohio, 46% would vote for incumbent Republican Kasich, 36% would vote for Democratic challenger Fitzgerald. In a separate hypothetical election today for Governor, 50% would vote for Kasich if he were opposed by Democratic challenger Larry Ealy, who gets 25%.

Cell-phone and home-phone respondents included in this research: SurveyUSA interviewed 900 state of Ohio adults 04/24/14 through 04/28/14. Of the adults, 810 were registered to vote. Of the registered, 618 were determined by SurveyUSA to be likely voters. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (71% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (29% of likely voters) were shown a questionnaire on their smartphone, tablet or other electronic device.

1 Which one issue is the most influential in your decision to vote? (choices rotated) Taxes? Public Safety? Job creation? Healthcare? Education? Gay Marriage? Medical Marijuana? Environmental issues such as fracking? Or something else?

13 Some actions of the Ohio government are reviewable by citizens and by the media, and other actions of the Ohio government are private, and cannot be reviewed by citizens or by the media. Ohio's economic development programs have been made private, and may no longer be reviewed by citizens or the media. Do you think this change was made to ... Improve economic development success? Or to prevent public examination?

** Too few respondents of this type were interviewed for this data to be meaningful.

Statement of Methodology: About the Poll: This poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. The pollster's report includes the geography that was surveyed; the date(s) interviews were conducted, the number of respondents who answered each question and the theoretical margin of sampling error for each question. Where necessary, respondents were weighted using the most recent US Census estimates for age, gender, ethnic origin and region, to align the sample to the population. In theory, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents with home telephones been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than sampling error. These include: the difficulty of interviewing respondents who do not have a home telephone; the refusal by some with home telephones to be interviewed; the order in which questions are asked; the wording of questions; the way and extent to which data are weighted; and the manner in which specialized populations, such as likely voters, are determined. It is difficult to quantify the errors that may result from these and other factors. Research methodology, questionnaire design and fieldwork for this survey were completed by SurveyUSA of Clifton, NJ. This statement conforms to the principles of disclosure of the National Council on Public Polls.
