In Nationwide Head-to-Head Match-Ups Today, 15 Months Till Votes Are Counted, Trump Does Not Break 44% Against Any Democratic Opponent, Loses USA Popular Vote Today to Challengers Biden and Sanders, Runs Even In Hypothetical November Pairings With Warren, Harris and Buttigieg:

In a hypothetical nationwide general election today --- which approximates the outcome of the USA popular vote but not necessarily the outcome of the Electoral College --- Democrats Joe Biden and Bernie Sanders defeat by 8 points Incumbent Republican President Donald Trump, according to research conducted by SurveyUSA. Trump runs effectively even against Democrats Elizabeth Warren, Kamala Harris and Pete Buttigieg.

At this hour, in interviews with 5,459 registered voters nationwide, it's:

- * Former Vice President Biden 50%, President Trump 42%.
- * Vermont Senator Bernie Sanders 50%, Trump 42%.
- * Massachusetts Senator Elizabeth Warren 46%, Trump 44% --- too close to call.
- * California Senator Kamala Harris 45%, Trump 44% --- too close to call.
- * Trump 44%, South Bend IN Mayor Pete Buttigieg 42% --- too close to call.

Among suburban women, where the election may be decided, Biden leads Trump by 24 points, Sanders leads Trump by 20 points, Warren leads by 17 points, Harris leads by 16 points, Buttigieg leads by 13 points.

Among critically-important independent voters, Trump leads Buttigieg by 4, leads Harris by 3, runs even with Warren, trails Biden by 6 and trails Sanders by 10.

Among high-school educated white voters, Trump leads Buttigieg and Harris by 30 points, leads Sanders and Biden by 21, leads Warren by 18.

Among single parents, Sanders leads Trump by 25 points, Biden leads by 22, Warren and Harris lead by 16, Buttigieg leads by 11.

Among Protestants, Trump defeats Buttigieg by 23 points, defeats Harris by 22 points, defeats Warren by 20 points, defeats Sanders by 17 points and defeats Biden by 15 points. Among Catholics, Biden and Sanders lead Trump narrowly; among Catholics, Trump leads Harris, Buttigieg and Warren narrowly.

In Evangelical households, Trump leads Buttigieg by 27 points, leads Warren and Harris by 25 points, leads Sanders by 21 points and leads Biden by 19 points.

In households with at least one family member who is gay, lesbian, bisexual or transgender, Sanders leads by 50 points, Biden leads by 46 points, Harris leads by 45 points, Warren leads by 44, Buttigieg leads by 38.

In households where 1 or more family members are part of the active military or a military veteran, Trump leads by Buttigieg by 23 points, leads Harris and Warren by 21 points, leads Sanders by 14 points and leads Biden by 13 points.

In union households, Biden leads Trump by 10 points, Sanders leads Trump by 9 points, Warren, Harris and Buttigieg effectively run even with Trump.

In households where respondents say they are "prospering" (regardless of what their income might be), Trump leads Buttigieg by 31 points, leads Harris by 29 points, leads Warren by 27 points, leads Sanders by 24 points and leads Biden by 18 points. In households where respondents say they are "poor" (regardless of what their income might be), Sanders leads Trump 2:1, Biden leads Trump by 29 points, Warren leads Trump by 27 points, Harris leads by 24 points and Buttigieg leads by 23 points.

About : SurveyUSA interviewed 7,000 adults nationwide 08/01/19 through 08/05/19. Of the adults, 5,459 are registered to vote and were asked the hypothetical head-to-head pairings you see here. The research was conducted online.

1 Are you registered to vote?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
